

R E M A R K S

Claims 5-13 are pending and under consideration. Claims 1-4 stand withdrawn.

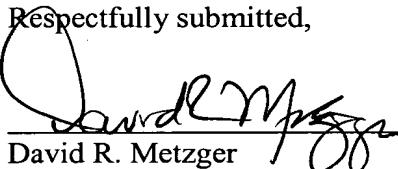

Regarding the objection to claims 5, 8 and 11, the noted informality has been corrected.

Regarding the rejection under 35 U.S.C. §112, claim 8 has been amended to include the antecedent bases noted in the rejection.

Regarding the rejections of the claims under 35 U.S.C. §103, claims 5 and 8 have been mended to recite that the gas permeable film is made of a porous insulating material. It is submitted that no combination of the prior art fairly discloses or suggests the use of such a layer in the manner noted in the claims. Accordingly, it is submitted that claims 5 and 8, and, *a fortiori*, claims 6-7 and 9-11, respectively, are patentable.

In view of the foregoing, it is submitted that the application is in condition for allowance. Notice to that effect is requested.

Respectfully submitted,

David R. Metzger (Reg. No. 32,919)
